

testSystemParameterizedConstructor

```
graph LR; A[testSystemParameterizedConstructor] --> B[SystemImpl::getName]; A --> C[SystemImpl::getValue];
```

The diagram illustrates a test method, `testSystemParameterizedConstructor`, which is represented by a gray rectangular box. From the right side of this box, two blue arrows point to two separate white rectangular boxes. The top arrow points to a box containing the text `SystemImpl::getName`, and the bottom arrow points to a box containing the text `SystemImpl::getValue`. This visualizes the test method's interaction with the `SystemImpl` class by calling its `getName` and `getValue` methods.

SystemImpl::getName

SystemImpl::getValue
